

SUPERIOR MOULD REMOVAL & PROTECTION SERVICE

Many people don't take mould seriously enough. When left untreated, mould can spread rapidly through colonisation, with potential negative impacts on the health of people living or working in the affected environment. Most off-the-shelf- treatments either do not work effectively (e.g. simply bleaching black mould and not killing it) or provide only temporary relief. Visible mould is only one part of the problem, it's the unseen mould spores that also need to be treated.

WE DON'T JUST KILL MOULD, WE STOP IT RETURNING

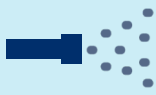

Our innovative Nanotise™ treatment is a unique and highly innovative method of not only killing visible and invisible mould, but exploiting nanotechnology to lay down a protective barrier on all surfaces that makes it very difficult for the mould to return.

To achieve this level of protection, we've added an anti-fungal component to our existing Nanotise antimicrobial solution. The result? Peace of mind that your home or workplace is safe.

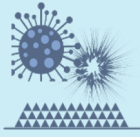

HOW NANOTISE® MOULD TREATMENTS WORK

1

Surfaces are sprayed with CRX formulation, which kills mould on contact, and then cleaned by hand to remove dead mould.

2

Special equipment dispenses a fine antimicrobial and antifungal mist that, once dried, bonds to all forming an invisible protective barrier of positively charged molecules that kill any mould spores, bacteria and viruses that come into contact with it.

3

The **Nanotise™** barrier remains in place and continues to defend against mould, viruses and bacteria

THE NO GERMS DIFFERENCE.

No Germs is an Australian, family-owned business with over 15 years experience in infection control and sanitation.

We're Australia's leader in **Nanotise®** applications that are proven to deliver superior, long-lasting protection against infection.

We use Australian-made, hospital grade TGA-registered disinfectant in our treatments.

Our commitment to protecting your staff, customers, and visitors is unparalleled – our reputation depends on it. That's why we personally oversee all applications to ensure they're done right.

We offer cost-effective packages for regular **Nanotise®** treatments, Prevention is better than cure, so call us now to set an appointment for your free quote.

WHAT OUR CLIENTS SAY

"For some 8 months, my 5 year-old son had not slept a full night due to an ongoing respiratory complaint. I called No Germs who found I had a mould problem which they duly treated. Within three days my son was sleeping right through the night and has done so ever since."

Helen K,
Homeowner, Northbridge NSW

"I was worried we had a serious problem with mould in our home – the smell was terrible! After receiving a very expensive quote, I contacted No Germs, who directed me to a licensed builder in order to make some structural changes. Before they treated the mould. My home is now mould and odour free. And No Germs charged me significantly less than my original quote."

Glen M
Homeowner, Gymea Bay NSW
